

CLAIMS

I claim:

1. A baking device, comprising:

a) a baking pan having a horizontal bottom wall and an upright peripheral wall disposed about the bottom wall, the peripheral wall having an inner surface facing toward the bottom wall; and

b) a plurality of equally spaced measurement indicia disposed on the inner surface of said peripheral wall to reflect measurements of distance in uniform increments;

whereby said baking pan and said measurement indicia define an item of bakeware with portion measurements.

2. The baking device of claim 1, wherein said peripheral wall comprises four upright sidewalls, each said sidewall having a top flange.

3. The baking device of claim 2, wherein said measurement indicia are defined by vertical, parallel lines on said sidewalls and said flanges.

4. The baking device of claim 3, wherein said measurement indicia reflect 1/4 inch increments.

5. The baking device of claim 4, wherein said measurement indicia on said flanges further include numerical dimension labels.

6. The baking device of claim 1, wherein said baking pan is made from aluminum.

7. The baking device of claim 1, wherein said baking pan is made from glass.

8. The baking device of claim 1, wherein said baking pan is made from ceramics.
